In addition to traditional classic. also includes important new results in the analysis of the kinetic theory and applied research in recent decades. part of long-term research. Analysis Kinetics (2nd edition) is divided into five chapters. Chapter constraints. The book with particular emphasis on the constraints of the study. and research on the constraints of the mathematical properties and mechanical properties as a cornerstone of Analytical Dynamics. The second chapter is a complete description of the Lagrange mechanics. The third chapter describes the nonholonomic system dynamics. This chapter. in addition to classic nonholonomic system dynamics research. also describes recent research on Kane equation. The fourth chapter discusses the variational principles of mechanics. Chapter V gives the Hamilton mechanics and to introduce Hamilton mechanics celestial mechanics. for example. The end of each chapter with exercises. The book can serve as the University of mechanics. mathematics. physics. and engineering high grade students and postgraduate teaching materials or teaching reference books available for teachers. research workers and engineering and technical personnel Reference. Chen Bin. author. born in 1937. Department of Mechanics. Peking University professor. Has long been engaged in the analysis of kinetics of the basic theory and related dynamics underlying theme of research. and gyroscope control. robot dynamics. and the variable structural dynamics. and aerospace engineering applications to carry out a series of research work.
